Diamond collection  
Design Moreno Ratti and Paolo Ulian

# Diamond

---

Diamond, the first piece of a family of washbasins characterized by the fragmentation of the optical surface. A further peculiarity of the washbasin is that has been studied a more inclined one, for a contemporary design or to facilitate the use, using the facet as a base, and giving visual lightness to a material that is historically heavy.

ULIAN & RATTI PER PORAPIETRA

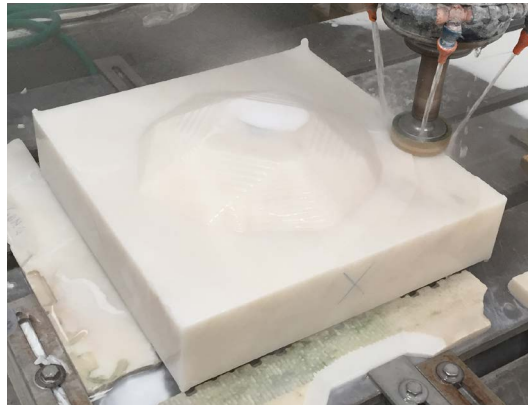

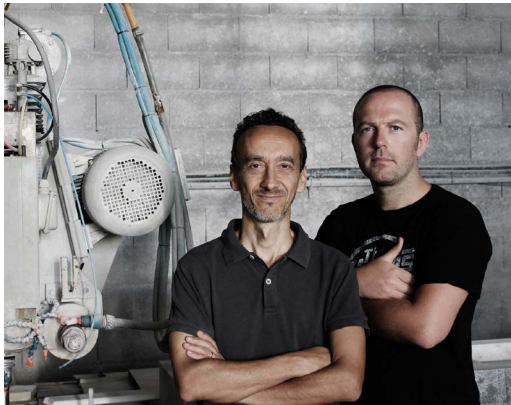

# Manufacture

---

Diamond was born by the iconography of the typical gemstone, with a clear triangular cut that creates different facets and that, like a diamond, comes in various shapes and sizes.

Paolo Ulian and Moreno Ratti

# Finishes

---

Available in different colors, Diamond comes in two sizes, diameter 50 cm and 18 in height, 45 cm diameter and 15 in height.
